ON-BOARD COMPRESSOR

Turchi can provide an on board compressor to be used with the DTH hammer. Whilst the capacity of the compressor is limited due to space and engine capacity, it does offer a very compact total unit for the DTH for guardrail pre-drilling.

SPECIFICATIONS

GENERAL SPECIFICATIONS

Air Displacement	litres per minute	1,050
F. A. D.	litres per minute	1,000
Maximum Working Pressure	bar	12
